

## Simulate Standard Plastics – Transparent

VeroClear™ is a rigid, colorless material featuring great dimensional stability for general purpose, fine detail model building and visual simulation of transparent thermoplastic such as PMMA.

### Simulate Transparent Shades and Patterns

#### Selected Digital Materials –

Combining transparent and black (rigid and rubber-like) materials enables the creation of different artistic patterns, (RGD7513-DM (Dots) & RGD7523-DM (Grid)), various transparent shades and Shore A values for simulating general purpose and polypropylene-like plastics.

#### Ideal for:

- Form and fit testing of clear or see-through parts
- Glass, eye-wear, lighting covers and light-cases
- Visualization of liquid flow
- Color dying
- Medical applications
- Artistic and exhibition modeling
